Software Engineer

2019-2023

FPT University

Projects

Trello clone

- Clone version of Trello, providing similar functionalities such as login, creating new boards, and drag-and-drop todos.
- Built with Next.js, authenticated with Clerk, and storing the data using Supabase.
- Clean and user-friendly UI
- Demo: <https://trello-clone-by-vh.vercel.app>
- Source Code: <https://github.com/VhoangT13/trello-clone>

KeyCrafter

- Landing page dedicated to showcasing and selling custom keyboards.
- Built with Html, Tailwindcss, JavaScript
- Responsive and mobile-friendly.
- Demo: <https://keycrafter.netlify.app>
- Source Code: <https://github.com/VhoangT13/KeyCrafter>

Developer Portfolio

- A concise and visually appealing showcase of my skills and projects.
- Built with Vite, Reactjs and Tailwindcss.
- Provide clean design and modern aesthetics, as well as mobile-responsive.
- Demo: <https://www.vhtr13.site>
- Source Code: <https://github.com/VhoangT13/portfolio>
